- Refer those who require specialized treatment as necessary.
- Provide information on prevention and management of preventable eye diseases.
- Encourage use of available nutritious food products in the area.

Every minute a child goes blind. Vision disorders are the most prevalent handicapping condition in childhood. Studies indicate that many of school children have impaired vision due to refractive errors. Such children (Specially from lower stata) need to be identified and timely helped for correction of their refractive errors, so that they can see well and grow well to their full developmental potential. Most of the vision impairment in children are avoidable – and can be treated with simple specs but due to low education they don't take this seriously. An eye screening camp has been organized at Better World Foundation ngo Faridabad serving construction site children's, Near Wazirabad Gurugram on 8 th April 2019 The objective of this program is to spread awareness on eye disorders, their early detection and to detect refractive errors and eye ailments among children. 175 kids in the age group 5-17 years along with few of their parents were screened during the camp .Free medicine was distributed to 91 children with eye related ailments, 47children with refractive error were provided with spectacle 2 with vision defects are referred for future screening at Base Hospital.

Total No. of Patients Screened	137
No of patients to whom Medicine(eye drop) was given	91
