Organizing support: Literacy India

Eye camp no-15/FY19-20

On July 19, Oxygen & Sahyog foundation conducted a special Eye Screening Camp in Caterpuri village, Gurugram. A medical team from Oxygen visited the village and held the free eye camp. The camp was organized in association with Literacy India at their learning Center.

Before the camp, the both the teams led several rallies and

awareness sessions to sensitize the community about the ophthalmic illnesses and the camp, to be held.

More than 221 patients visited the camp. The team of Doctor examined each patient carefully and prescribed the required management including operation, medication or treatment; which varied case to case. 93 Spectacles and 103 eye drops were handed over to the patients requiring them. 14 patients were identified with cataract and 9 were referred for further examinations.

Patients awaiting for their turn at centre

were counselled By Oxygen CSR team about how to take care of their eyes and what are the dos and don'ts. Doctors also referred to many of the severe cases to the nearby government hospitals where they could consult for free or on a minimum cost.

The efforts of the Doctors' team were commendable as they not only examined well but also came with the required optical services and pieces of equipment. They thoroughly checked the patients taking note of their earlier infections or allergies. The patients were pleased to get themselves checked by such wonderful medical staff. In spite of the long queue, they all kept patience. In turn, the Doctors also took enough time to examine them and communicated politely.

Team from Literacy India thanked Medical team & Oxigen team and said "We hope to have more such health camps on a frequent basis in future" Patients expressed their gratitude with a big smile and words "Keep helping us".
