Eye camp no-7 /FY20-21

26th November 2020 Regular eye checkup camps have always been a priority for Sahyog foundation to contribute its services to the underprivileged or financially weaker sections of the society. In this regard, Sahyog organized an eye checkup camp in Village Bandwari where in patchy health care services are available in the area, the population there is almost deprived of quality medical facilities. The camp attracted residents of Bandhwari and nearby villages which included individuals of all age groups and over a 115 poor patients were screened. In cases where patients were prescribed medicines, free medicines were distributed in the camp. On screening, about 11 were identified with cataract who will be operated free of cost sponsored by Sahyog Foundation.

On this occasion Dr and CSR team, addressed all those present at the campsite and also promised to do such social service from time to time. Other than that camp also helps in knowing any other problem that could affect vision. Free eye drop and medicines were given to the patient requiring it free of Cost. Vision power was checked and appropriate spectacles were prescribed and handed over to the patient's right at the camp site making everyone happy to receive them without waiting. Smile on the faces of elderly after getting a spectacle made our day.

In all 115 patients attended the camp. 53 spectacles and 79 eye drops were handed over to the patients requiring it and 11 patients were identified with Cataract.
